FOREST GARDENING

DOWNLOAD

Alphascript Publishing. Taschenbuch. Book Condition: Neu. 220x150x5 mm. Neuware - Forest gardening is a food production and land management system based on replicating woodland ecosystems, but substituting trees, bushes, shrubs, herbs and vegetables which have yields directly useful to humans. By exploiting the premise of companion planting, these can be intermixed to grow on multiple levels in the same area, as do the plants in a forest. In part based on the model of the Keralan home gardens, temperate-climate forest gardening was pioneered by the late Robert Hart on his one eighth of an acre plot at Wenlock Edge in Shropshire. Robert began the project over thirty years ago with the intention of providing a healthy and therapeutic environment for himself and his brother Lacon, born with severe learning disabilities. 96 pp. Englisch.
