By C Mitzky Co

Not Avail, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1893 Excerpt: .average 24 per cent. It is only in very tender skinned fruit that a per cent, or two, more or less, will make a difference jn the result. The following are the most available antiseptics. Salicylic acid, boracic acid, sulphurous acid and its compound, bisulphate of soda (and lime), and last but not least, bichloride of mercury or corrosive sublimate. Sylicylic Acid, or its compound, is one of the best and most energetic preservators, a solution of one ounce of salicylic acid to five gallons of water, to which as much glycerine has been added as corresponds to the density of the fruit juice, constitutes a preservative fluid, which has been used with very satisfactory results. The acid will dissolve readily in water heated a little. Boracic Acid is not well adapted to long conservation of samples in their natural aspect, but will do well...
