

Comptes Rendus of Observation and Reasoning (Classic Reprint) (Paperback)

By J Y Buchanan

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Comptes Rendus of Observation and Reasoning In the Chemical and Physical Notes, which formed part of the Antarctic Manual of 1901, will be found a resume of my experiments in the domain of Inorganic Natural History which, from my own experience, I judged would be found useful by the Chemists and Physicists of the Expeditions for which the Manual was prepared. It was conveyed to me through an old friend and former colleague that this contribution to the Antarctic Manual had done much to retard the Standardisation of Research. I took it as a compliment To standardise research is to limit its freedom and to impede discovery. Originality and independence are the characteristics of genuine research, and it is stultified by the acceptance of standards and by the recognition of authority.
